Experience

Software Engineer · Exploration   MAY 2021 — Present
California, USA (Remote)

- Deliver high-quality, robust production code for a diverse array of projects for a multitude of services as a full-stack
- Built RESTful APIs for authentication, permissions, and token management with improved control in database calls
- Successfully introduced and promoted the adoption of Typescript for development
- Optimized local development for the engineering team by introducing Docker to orchestrate multiple applications
- Improved a backend service performance by utilizing asynchronous views to process concurrent requests efficiently

Software Engineer · ExecOS   JANUARY 2020 — MAY 2021
TENNESSEE, USA (Remote)

- Developed a payment gateway using integration of Stripe in frontend and backend
- Liaise with team lead and CEO to build and ship a well-designed product
- Integrated cryptocurrency APIs to accomplish backbone of a DCA feature of the web application for investment

Mechanical Engineer · Convoluted Technologies   FEBRUARY 2018 — APRIL 2019
SYDNEY, AUSTRALIA

- Provide technical support for customers and sales team
- Maintain and oversee production to deliver client needs on time
- Lead restorations of critical safety equipment to minimize customer production downtime

Application Engineer · Concepcion-Carrier   MARCH 2017 — SEPTEMBER 2017
ALABANG, PHILIPPINES

- Provided immediate technical support for Sales Engineers to achieve target sales
- Attended pre-bid and sales meetings. Managed and interpreted customer requirements
- Handled cost sheets, quotations, and other needed documentation

Plant Engineer · Philippine Batteries Inc   JULY 2016 — JANUARY 2017
BULACAN, PHILIPPINES

- Led special projects on Energy Efficiency Management including Hybrid Solar ACUs and waste heat recovery system
- Handled project cost and savings evaluation for air conditioning of the rectifier room
